2. Background: The Program and Budget Staff has agreed to support this conference by providing a 10-to-15 minute overview of the NFIP budget process. This overview is intended to stimulate discussion among and increase the knowledge level of the working-level conference attendees regarding how an individual initiative might work its way through the process to finally become a part of the NFIP. Planning and Policy Staff will also be providing support through a presentation on concerns noted by program managers at the last off-site conference. While the Director, Program and Budget Staff, had originally planned to attend; scheduling conflicts now prevent him from doing so. (C)
